

News Programmes Operations
Salford Team Shifts and Working Pattern

- Operating Model Principles -

This document aims to outline the principles for the shift system for the News Programmes Operations team based in North.

It follows the engagement and consultation process with the entire Salford team over the last 18 months at working groups and discussions at team Forums.

The outcome of these groups was a clear preference towards a system of mainly fixed length shifts.

This document aims to provide details on the principles of how this could work, and what it means for members of the team on Flexibility Allowance, UPA1, and UPA2.

The aim is to put in place by the end of June 2011, a system of shifts and a work pattern that reflects our programme commitments based on the outcomes of the Salford team forums and working party.

Initial terms of reference for rota and shift group:

"To have a system of allocation for Safford which covers the work, and is fair, efficient and innovative, keeping positives from our current allocating practices where possible."

We will be reviewing the work pattern in March 2012, by which time the 16 week rota cycle will have been completed at least once.

Flexibility Allowance, UPA1 and UPA2:

These guiding principles would apply to everyone within the team.

- Standard shifts are normally 8 (Es) or 10 (Ts) hours long. Nights (Ns) are 10 hours long.
- 8 hour shifts could be scheduled in advance to be extended by up to 1 hour, 10 hour shifts can be extended by up to 2 hours. These extensions would normally be offered as EDP in the next 14 days if required.
- No accounting period. Core hours are averaged to 40 hours per week over the 16 week rota pattern. Any additional hours worked above the core would be paid as overtime or comp leave given.
- Individuals could be scheduled up to 8 hrs overtime per calendar month.
- Sports Extra covered on an E or T if on a rota'd day on, or by extending existing shifts as appropriate. It could also be offered as an overtime shift, duration appropriate to the work as per existing agreement on minimum turn of duty. You could also agree to move a day elsewhere.
- Location work covered by shift length appropriate to the work.
- On the 16 week rota (indicative for flexi and UPA2), there are 70 appearances which average out to 17.5 in a 4 week period, compared to the current TVC UPA 1 rota which has an average of 19 appearances in 4 weeks. (76 in 16 weeks).
- Accommodating the Sports Extra requirement, leave availability is normally 2 days and 1 night Sun – Fri, and 1 day and 1 night on Sat. (fewer rota'd shifts on Saturday). Christmas and summer leave dealt with separately as is the current arrangement.
- Leave booked against the rota would be accounted for as per the rota'd hours, i.e. leave on a rota'd E would use 8 hrs, and a T 10 hrs. Other absences would be accounted for in the same way.
- Additional leave could be given subject to operational requirements.
- Online request system continues.

UPA I

- Rota'd days on/off wouldn't normally be changed without agreement with the individual. (8 and 10 hr shifts add up to the correct number of hours over the rota cycle.)
- More than 5 weeks to go:
 - Nights on the rota can turn to days.
 - To give greater leave flexibility Es can be changed by the office to Ts. Ts can be changed to Es. Normally in a reciprocal arrangement. The shifts wouldn't be more than 4 weeks apart.
 - An early E can be requested in advance. This wouldn't be changed to a T or Night.
- Within 5 weeks these changes could happen with consultation.
- 3 Weeks Hours Published (more if appropriate)
- Up to 14 days, hours could change
- Hours won't be changed without consultation with less than 14 days to go.
- Work on a non-rota day would be paid as overtime/comp leave unless there was an agreed swap. There is no minimum duty for overtime.
- Leave applied for based on the rota'd days

Flexi Allowance:

- Indicative Rota (same principle as TVC):
 - Days on and off can change with more than 5 weeks to go. (3 days/night a month can be locked in advance).
 - Start times and/or length of shift can change up to midday the day before the shift.
 - At 10 weeks to go, the office will be able to make changes to the days on and off and turn nights into days, days into nights but will observe any requests made by individuals via locks or requests.
- At 5 weeks to go, days on, days off and nights will then be published. They won't change from that point without consultation.
- With more than 5 weeks to go, Es and Ts can change as per UPA1, additional appearances could be scheduled. For example, 4 Ts in 1 month could be changed to 5 Es, no additional hours so no overtime payable.
- At 3 weeks to go, allocated hours will be published. The times of shifts may still be subject to change until up to 12:00 the day before a shift starts. Any additional hours worked on the day would normally be offered as overtime.
- Any change made to shift times later than 12:00 the day before the shift starts can only normally be done with agreement of the staff member affected.
- Once leave is approved, any adjacent off days will be considered to be locked.

UPA 2

- Indicative rota – no 'flexi-locks'.
- Days on/off published at 5 weeks – may have changed from the indicative rota.
- At 3 weeks to go, allocated hours will be published. The times of shifts may still be subject to change until up to 12:00 the day before a shift starts. Any additional hours worked on the day would normally be offered as overtime.
- Leave booked based on indicative rota
- Once leave is approved, any adjacent off days will be considered off too.
- With more than 5 weeks to go, Es and Ts can change as per UPA 1, additional appearances could be scheduled. For example, 4 Ts in 1 month could be changed to 5 Es, no additional hours so no overtime payable.

Formatted: Portuguese (Brazil)

Part Time

- Part time staff members in the team will have a rota that gives the same proportional number of nights and weekends.
- Other conditions as per UPA 1, UPA2 or Flexibility Allowance.
